Merania_ ceramic products from Istria

Since 1993., with a lot of love, hard work and always expressing creativity and innovation, Merania grew from a small pottery workshop into a family-run ceramic manufacture. Today, in our workshop, we create first-class ceramic lighting items, tableware for professional and home use and other ceramic products for interiors and exteriors. Our products are inspired by traditional and modern forms and decorations, but always taking care of the artistic value of every piece.

Lighting items

Products from the lighting items group were developed for rustical interiors in Istria. Every lighting item from our production is a work of art as well, combining the art of clay modelling, traditional maiolica handpainting and the art of creating lamp elements out of wrought iron. Our lighting program also include modern and industrial lighting forms, glazes and finishes.
